## Search engine configuration (Elasticsearch)

**! Warning:** Any changes to the configuration will only take effect after a full reindex. Until then searching may not work correctly.  
**Weight:** define weight as a positive number. Higher numbers indicate increased relevancy. **Note that fields weighting works only for simple search.**

1. Only search fields mapped with biblios can be weighted
2. Search will boost/increase weighted field(s) relevancy

- Koha verwendet Elasticsearch derzeit wie Zebra
- Alles ist eine "query\_string query":  
("Koha") AND date-of-publication:[1999 TO 2005]
- Unser Patch ist ein erster Schritt, die nativen Elasticsearch Suchoperatoren zu verwenden
- z.B. für Time ranges oder komplizierte Verknüpfungen
